DETAILED ACTION

Allowable Subject Matter

1. Claims 1-26 are allowed.
2. The following is an examiner's statement of reasons for allowance: with respect to claims 1, 11 and 21, in addition to other limitations in the claims, the prior art fails to teach or disclose the applicant's invention as claimed, particularly the feature describing a buffer configured to store and output the clocked-in data group and the associated sequence number, and using the associated sequence number as a memory address.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lui et al (6,724,328) and Venkata et al (2003/0052709) discloses a communication system having multiple data channels comprises local phase-shifted clock signal, FIFO buffer, counter, and memory, but the buffer doesn't output the associated sequence number, and the associated sequence number is not used as a memory address.
